

Mounting base - wind turbine Dragon 1000 + / 1500 +

User manual, warranty card

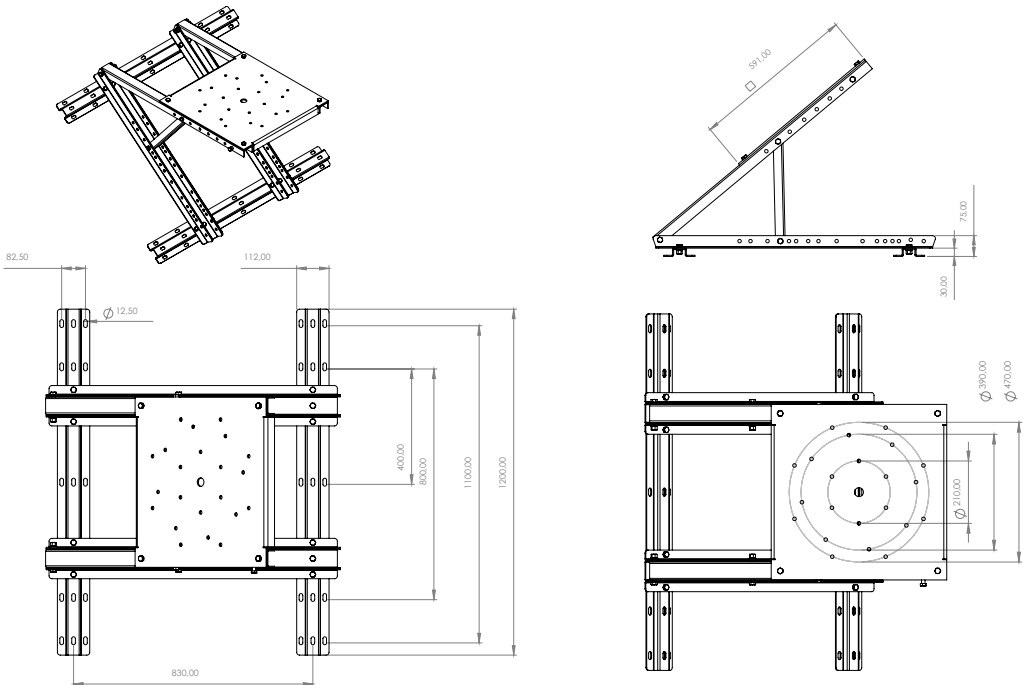

Product description:

The mounting base for the Dragon turbine allows for installation in various places, including:

- on walls and roofs of buildings,
- on an independent mast,
- on farm buildings and gazebos.

The bracket allows for easy and safe installation of the Dragon turbine on pitched roofs, making it a practical solution for various types of buildings. The solid construction of the bracket guarantees full safety of the turbine installation, ensuring stability and resistance to weather conditions
